

Our family has been on the Do Not Call list since its inception and we have appreciated the cessation of annoying telemarketing calls. Please do not weaken or change New Jersey's Telephone Consumer Protection Act, before this law the telemarketing had become so persistent that we would only answer the phone if we were absolutely certain that we recognized the caller on the caller ID. Once the law went into effect our daily phone calls dropped by over 50% and it became safe to answer the phone again.
